

Competency 16: Ensure seamless transition after discharge (Step 10)

Performance Indicators: 62, 63

Knowledge, Skills and Attitudes (KSA) Displayed	Competent	Needs to improve	Comments
<p>Prepared for the consultation</p> <ul style="list-style-type: none"> Staff aware of engaging in meaningful conversations that ENCOURAGES* the patient and family members. 			
<p>Established rapport</p> <ul style="list-style-type: none"> Introduced self and supervisor. Explained reason for communication. Asked permission to continue. 			
C16 PI 62: Develop individualized discharge feeding plans with a mother that includes at least 6 points.			
<p>Using Foundational skills, assess a feed and the general health of mother and baby, then choose appropriate points that are relevant to the specific mother's and baby's needs to develop a plan, such as:</p> <ul style="list-style-type: none"> Review mother's understanding of her baby's unique feeding cues. Review baby's ability to achieve a comfortable latch, and Review signs of milk transfer with infant swallowing. Review signs of adequate of adequate intake (stools and urine). Review mother's understanding of her baby's need to feed frequently at least 8 times in 24 hours or more. Review with mother the importance of eye-to-eye contact with baby while feeding. Remind mother to let the baby finish nursing on the first breast, then offer the other breast until the baby seems satisfied by releasing the breast. Review mother's position (how she holds baby) to assure comfortable, pain-free feeds. <p style="text-align: right;"><i>(Continues... next page)</i></p>			

<ul style="list-style-type: none"> • Review mother’s understanding of ensuring / enhancing milk production and let-down. • Review mother’s understanding of hand-expressing colostrum/breastmilk and why this is helpful. • Reinforce mother’s awareness of risks of other fluids and importance of exclusive breastfeeding for 6 months. • Reinforce mother’s awareness of risks and uses of pacifiers and teats. • Reinforce that very few medications or illnesses are contraindicated during breastfeeding. • Provide mother with accurate sources of information and how to get help if needed. • Provide the mother with information for continued breastfeeding and general health support in the community. • Remind mother that adequate food and drinks support her general health because special foods are not needed for breastfeeding. • *as applicable* Appropriate guidance specific to the mother/infant dyad. • *as applicable* Reinforce mother’s understanding of safe sleeping (breastfeeding and co-sleeping) arrangements. • *as applicable* Observe mother’s ability to correctly use and care for her breast pump. • *as applicable* Observe mother’s ability to correctly prepare and use infant formula.
